SUMMARY

Computer Science Engineering student at VIT Bhopal with hands-on experience in full-stack web development using Django REST Framework, React.js, and MySQL. Built projects involving REST API design, JWT authentication, Role-Based Access Control (RBAC), data processing, and interactive dashboard development. Currently interning in cybersecurity with exposure to web application security concepts. Interested in full-stack development roles.

EDUCATION

VIT Bhopal University — Int. Mech, Computer Science and Engineering (Cybersecurity) June 2023 – Present
CGPA: 8.73

Holy Angels HR. Sec. School, Ashta, M.P — Class XII (M.P Board) April 2022 – May 2023
Percentage: 90.2%

TECHNICAL SKILLS

- **Languages:** Java, C++, JavaScript,
- **Frontend:** HTML, CSS, JavaScript, React.js, Next.js
- **Backend & Database:** Django REST Framework, REST APIs, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib
- **Concepts:** JWT Authentication, Role-Based Access Control (RBAC), REST API Design, Data Visualization

EXPERIENCE

Security Analyst Intern — ParshWebCraft June 2026 – Present

- Working on web application security tasks including authentication and authorization workflows
- Applying concepts of access control, vulnerability identification, and secure system design
- Gaining hands-on exposure to security tooling and defensive security practices
- Participated in application security reviews and threat analysis activities

AI and Data Analytics Intern — AICTE (Green Skills Program) July 2025-August 2025

- Gained foundational exposure to Machine Learning concepts and workflows
- Performed data preprocessing, visualization, and basic model training using Python
- Worked on a real-world case study: EV Vehicle and Charging Demand Prediction
- Hands-on experience with Jupyter Notebook, Pandas, NumPy, and Scikit-learn

PROJECTS

Multi-Layer Cloud Security Simulator

- Built a full-stack cloud security simulator using Django REST API and React + Vite
- Implemented JWT authentication and Role-Based Access Control (RBAC) for secure API access
- Developed firewall filtering and attack detection modules to simulate real-world cloud security
- Created an interactive dashboard for monitoring security logs and suspicious activity
- Demonstrated layered security concepts across IaaS, PaaS, and SaaS environments

Chemical Equipment Parameter Visualizer

- Built a hybrid analytics platform using Django REST API, integrating React (web) and PyQt5 (desktop)
- Implemented data processing and analysis using Pandas with real-time data synchronization across platforms
- Developed interactive visualizations using Chart.js and Matplotlib
- Added CSV parsing, dataset history tracking, and PDF report generation

CERTIFICATIONS

- Google IT Support Professional Certificate — Google
- The Bits and Bytes of Computer Networking — Google
- Introduction to Cybersecurity — Cisco Networking Academy
- TCS iON Career Edge — Young Professional — Tata Consultancy Services
