SUMMARY

Computer Science Engineering student with hands-on experience in frontend development using HTML, CSS, JavaScript, and React.js. Skilled in building responsive user interfaces and integrating frontend applications with backend APIs. Experienced with Git and GitHub for version control and developing modern web applications. Completed projects involving data visualization and interactive UI design. Interested in frontend development roles while building foundational knowledge in cybersecurity.

EDUCATION

Holy Angels HR. SEC. School, Ashta, M. P

April, 2022 - May, 2023

M.P Board (CLASS XII)

CGPA: 90.2

VIT BHOPAL UNIVERSITY

June, 2023 - PRESENT

Computer Science and Engineering

CGPA: 8.71

TECHNICAL SKILLS

- **Languages:** Java, C++, JavaScript, SQL
- **Frontend:** HTML, CSS, JavaScript, React.js, Chart.js
- **Backend & Database:** Django REST Framework, REST APIs, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook
- **Libraries & Technologies:** Pandas, NumPy, Scikit-learn, Matplotlib, JWT Authentication

Experience

Internship on Artificial Intelligence and Data Analytics focused on Green Skills, organized by AICTE

- Gained foundational exposure to Machine Learning concepts and workflows
- Performed data preprocessing, visualization, and basic model training using Python
- Worked on a real-world case study: *EV Vehicle & Charging Demand Prediction*
- Learned application of AI in sustainability, clean energy, and environmental planning
- Hands-on experience with Jupyter Notebook, Pandas, NumPy, and scikit-learn

PROJECT

Chemical Equipment Parameter Visualizer

- Built a hybrid analytics platform using **Django REST API**, integrating **React (web)** and **PyQt5 (desktop)**
- Implemented data processing and analysis using **Pandas**
- Enabled real-time data synchronization across platforms
- Developed interactive visualizations using **Chart.js** and **Matplotlib**
- Added CSV parsing, dataset history tracking, and **PDF report generation**

EV Vehicle/Charging Demand Prediction model

- Developed a machine learning model to predict EV charging demand
- Performed data preprocessing and analysis using **Pandas** and **NumPy**
- Implemented predictive models using **Scikit-learn**
- Trained and evaluated models on **Google Colab** environment
- Improved prediction accuracy through data cleaning and feature selection

Multi-Layer Cloud Security Simulator

- Built a full-stack cloud security simulator using **Django REST API** and **React + Vite**.
- Implemented **JWT authentication** and **Role-Based Access Control (RBAC)** for secure API access.
- Developed firewall filtering and attack detection modules to simulate real-world cloud security.
- Created an interactive dashboard for monitoring security logs and suspicious activity.
- Demonstrated layered security concepts across **IaaS, PaaS, and SaaS** environments.

CERTIFICATIONS

- * The Bits and Bytes of Computer Networking- (GOOGLE)
- * TCS ion Career Edge-Young Professional (TATA)
- * Introduction to cybersecurity- (Skillup)
- * Matlab onramp
- * Google IT support certificate
